

**“I don’t think Doug Ford
should be trusted with
public health care.”**

Listen to nurses.

When it comes to health care, this government has a lot to answer for. Underfunding the system is a direct cause of the nursing shortage, which led to 1,199 ER closures in 2023. Paying private clinics more than hospitals get for identical medical procedures is a misuse of taxpayer dollars. Defunding public health reduces health-care programming for entire communities. Inadequate inspection of long-term care caused deaths that should never have happened.
