

“Privatization of health care would mean even more staffing shortages, even less funding, even less resources.”

**Nurses
talk
truth.**

The real cost of privatization.

Doug Ford's shift towards private health care is underway, and nurses and health-care professionals across the province are warning about what's ahead. Nurses will be lured away from the public system by for-profit providers - in fact, that's already happening. Equal access to quality care, a core Canadian value, is seriously at risk. If Ford gets his way, health care will be in the hands of big business and, one way or another, that's going to cost all of us more.
